

Product Offer Sheet

Hot-washed recycled PET flakes - Industrial B2B supply

PC-POS-001 / Version 0.1 / 07 September 2026

Poly Cleaner LLC (Poly Cleaner MMC) recycles post-consumer PET bottles in Azerbaijan into hot-washed rPET flakes for export. Supply is aligned with the buyer's application, colour requirements and agreed lot specification.

PRODUCT STREAMS

Grade	Potential applications	Qualification
Clear / light-blue	Sheet, fibre and selected packaging-related conversion	Light-blue share and contamination limits agreed per order
Green	Strapping, fibre and coloured PET conversion	Colour and technical requirements agreed per order
Mixed-colour	Fibre, strapping and non-clear industrial conversion	Colour mix and processing suitability subject to buyer trial

SUPPLY AND COMMERCIAL TERMS

Origin and form: Azerbaijan; washed and dried PET flakes. Current process uses an approximately 14 mm granulator (crusher) screen; this is not a guaranteed particle-size distribution.

Packaging: big-bag supply. A documented reference shipment comprised 22 bags of 1,000 kg each (22 tonnes). Bag construction, net weight, palletisation and loading quantity are confirmed in the quotation.

Availability and pricing: current stock, monthly allocation, minimum order, lead time, price, currency and payment terms are provided on request. This sheet is not a fixed-price offer or stock reservation.

Delivery: DAP and alternative delivery terms can be evaluated for the named destination. Transport arrangements and supporting documents are agreed for each order.

SAMPLE TO REPEAT SUPPLY

Send the required grade, application, monthly volume, specification and destination. Sample review and technical alignment precede a trial shipment; repeat supply follows agreed quality and delivery performance.

Technical specifications are provided in PC-TDS-001. Poly Cleaner works with customers to align product quality with their processing and application requirements, with samples available for evaluation before supply. The product is supplied for non-food-contact industrial applications.
